This report provides aggregate historical and projected economic and demographic data for the nine Southeastern states from 1972 to 2020. The data are presented for SMSA's and non-SMSA counties within the states of Alabama, Florida Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee and Virginia. The report summarizes detailed data presented in separate volumes for each state.

BG Kenneth E. McIntyre
Division Engineer
U.S. Army Engineer Division, South Atlantic
510 Title Building
30 Pryor Street, S.W.
Atlanta, Georgia 30303

Dear General McIntyre:

In accordance with the provisions of our agreement, Intra-governmental order number SADPD-75-1 dated 30 September 1974, we are pleased to submit the summary volume of economic projections for the nine Southeastern States.

This report provides aggregate historical and projected economic and demographic data for the nine Southeastern States from 1970 to 2020. These data in "camera copy" have been forwarded under separate cover to Mr. Owen D. Belcher of the Planning Division staff.

During the progress of this project, it has been necessary to consult with, and obtain the cooperation of, members of the South Atlantic Division and its various district offices. I would like to express my appreciation for the excellent professional relationships which have developed between our respective staffs.

If you have any questions regarding this report or the OBERS program in general, please don't hesitate to call us.

Sincerely,

Daniel H. Garnick

DANIEL H. GARNICK, Associate Director
for Regional Economics

Enclosure

ACKNOWLEDGMENTS

This report was prepared by the Bureau of Economic Analysis under the general direction of Daniel H. Garnick, Associate Director for Regional Economics with work being performed in the Regional Economic Analysis Division (READ).

Edward A. Trott, Jr., Assistant to the Chief of the READ had direct responsibility for preparing the report and making the projections. Eugene Janisch, who developed the monitor system; Lyle Spatz and Marian Sacks all economists on the READ staff participated in all phases of the study.

The help of various members of the South Atlantic Division, U.S. Army Corps of Engineers and in particular Owen D. Belcher; also James Eblen of the Tennessee Valley Authority, both of whose guidance and help were instrumental to the report's completion.

Last, but certainly not least, those planners, demographers, and economists from all levels--Federal, State, local and private, who participated actively in the state review meetings and without whose comments the project would have lost its "local" input.

FOREWORD

The population projections in this report incorporate the Census Bureau's 1972 "Series E" national population projections--birthrate of 2.1--and the Bureau of Economic Analysis' alternative regional disaggregations thereof as published in each of the State volumes in Table. B-3. The projections of personal income, earnings, employment and the attendent relatives are based on these alternative population projections and therefore may differ from those shown in the main body of the State volumes.

These alternative aggregate economic projections were prepared because of continued shifts in population and economic activity since the 1971-72 benchmark period of the OBERS-E projections. These alternative projections rely on data through 1975 and the Regional Economic Analysis Division's Monitoring System.

This system enables the user to view, in an objective manner, departures from the "normal" trend lines of the baseline projections; adjustments can then be made to accomodate these variations if warranted by the recent data.

At the present time, detailed economic data are not available below the State level beyond the 1972-73 period. Realizing, however, the need of local planners to assess income and employment levels based on the alternative population projections, aggregate relationships were extended and applied to the alternative population projections with the results shown in Tables 1 through 8 of this report.
